

## Year 11 transition into A level Chemistry

A YouTube Chemistry legend is machemguy. He teaches OCR but most of the content is the same.

He has put together a transition playlist for Y11 students.

<https://www.youtube.com/playlist?list=PLi6oabjl6cofxWBiNdLhaHh9hfXzhQdQ>

This playlist is for A level Chemistry students but many of these videos cover topics you have already studied in GCSE Science.

It would be a good idea to watch some of these videos over the next few weeks.

We will go over all of this content in Y12 so don't worry if you find some topics difficult.

Mr Goalby is a legend when it comes to writing revision notes for A level Chemistry. He is an examiner and uses all his experience to make very clear notes that cover every question from previous exams. You will be given these notes in Y12 and 13

<https://chemrevise.org/revision-guides/>

He also has a list of books you might be able to order online. They would give you something to talk about when you write your personal statement for university applications at the end of Y12

E Rintoul also has great videos
