National Crime Agency

Cyber4Summer

The National Crime Agency has partnered with Immersive Labs, who provide on-demand learning resources, to create an interactive platform where teenagers can develop their cyber skills safely and legally.
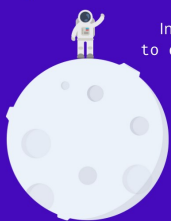

The platform, Cyber4Summer, consists of over 100 different labs, covering a broad range of cyber security themes and skill areas such as staying safe online, encoding, encryption, ethical hacking (red teaming) and defending (blue teaming).

Cyber4Summer

Immersive gaming labs to develop responsible cyber skills

Immersive Labs

Immersive Labs is the world's first fully interactive, on-demand, and gamified cyber skills platform. Their technology delivers challenge-based skills content developed by experts with access to the latest threat intelligence. Their unique approach engages and measures entire workforces, equipping all employees with critical skills and practical experience in real-time. Immersive Labs simulates cyber scenarios covering everything from the basics to threat hunting and reverse engineering malware. At the heart of our platform are labs: story-driven exercises accessed from a browser in seconds. There are hundreds of practical, gamified labs dedicated to a huge range of skills and mapped against industry frameworks.

The labs are targeted at 13-18 year olds with entry to intermediate level cyber skills and are currently free to access for three months.

The labs include gamified and 'capture the flag' style challenges, putting the student in the role of a cyber crime investigator!
